Abstract: China’s entry to the World Trade Organization (WTO) will allow both domestic and overseas construction firms to compete under the same market conditions. This development will lead to a more rigorous participation from overseas construction professionals in the Chinese construction market. Nevertheless, ……

Keywords: China; Construction industry; Contracts; Competition.

1. Introduction

Bidding appears to be the dominant mechanism for allocating construction contracts in most market economies. In line with the shift from a planned economy to a socialist market economy in China, bidding has also become the major mechanism for allocating works to contractors in the Chinese construction market. Bidding mechanism was introduced to the Chinese construction market in the middle 1980s, and its application has ……

Generally, in deciding which contractor is awarded a contract, a public sector client is essentially comparing competitiveness between competing contractors. Thus improving competitiveness is a contractor’s major strategy……

2. Construction Business Environment in China

In line with China’s entry to the World Trade Organization (WTO), the operation and authorities. The Chinese government has been developing ……
